

# Flower of Life Workshop

In Prague - ancient crossroads of cultures - there will be a 3 day „Flower of Life Workshop” lead by Anne Ward from Scotland - international facilitator of the workshop on the teaching of Drunvalo Melchizedek on the Flower of Life - woman who gently makes this workshop special with Hathor sound healing.

The workshop introduces the Right Eye of Horus Mystery School teachings about sacred geometry and the merkaba meditation.

This is a unique, heart opening, experiential, and profoundly loving workshop offered to assist Mother Earth and All Life in our current transition into higher dimensions of love and light. Our time together celebrates unconditional love, and helps to heal your inner child and thus connect you more profoundly with your Higher Self. When you have a good connection with your Higher Self you receive moment by moment guidance on how to proceed.

- ❖ We will learn about the sacred geometry of the Flower of Life grid and how the Platonic Solids are embedded within it, and prove that every single cell in your body contains Creator consciousness.
- ❖ We learn the MerKaBa meditation to activate a powerful interdimensional vehicle of light around our body. This practise clears energy blocks, raises your consciousness, and helps you remember who you are and what you are here to do.
- ❖ We experience Hathor sound transmissions and sound healing through Anne's voice. (The Hathors are interdimensional energy beings - masters of sound, energy, and love)
- ❖ More and more we understand that our ascension into higher frequencies, higher consciousness, depends upon our connection and relationship with Mother Earth. We will learn the Unity Breath, a beautiful love and Earth healing meditation to embody the flow of love between Mother Earth and Father Sky.
- ❖ Anne incorporates a beautiful spiral chi kung ceremony to collect and integrate the energies of the Earth and the Cosmos into our energy bodies.

This is very much an energetic and experiential workshop, continuously balancing our male and female energies, our left and right brains, our emotional and mental bodies, our yin and yang.

Anne says as students become more adept in their practise, their lives change profoundly as they open to the unlimited potential of their human spirit and find themselves making powerful changes which they have previously resisted.
